

曼切斯特大学前学生涉嫌论文工厂

当地时间 1 月 30 日，曼切斯特大学发布公告，该校一名前学生 **Sameer Quazi**（目前就读于剑桥一所大学）涉嫌运营论文工厂。公告指出，2023 年 9 月，学校收到关于该学生学术诚信的举报，随后的调查揭示了该学生多篇论文涉及学术不端，这些论文所陈述的研究均不是在曼切斯特大学完成，学校已经致函出版商要求对十篇论文进行撤稿。

Statement on research misconduct

In September 2023 a concern was raised about the conduct of Sameer Quazi, Founder and CEO of GenLab Biosolutions Private Limited, India, regarding publication ethics.

The University of Manchester completed an investigation and reached a finding of research misconduct against Mr Quazi, who is no longer enrolled as a student at the University.

The investigation was conducted in accordance with the University's Code of Practice for Investigating Concerns about the Conduct of Research. The Panel of Investigation noted no research in the papers was completed at The University of Manchester and found a large number of instances of other types of research misconduct in relation to Mr Quazi's sole- and co-authored papers. The Panel of Investigation was of the view that Mr Quazi was running a paper mill. Publishers have been contacted to request retraction of ten papers.

根据信息显示，**Sameer Quazi** 以曼切斯特大学为作者机构，独立以及共同署名发表多篇学术论文。共同作者涉及伊朗，印度，俄罗斯，巴基斯坦等国家。目前尚不清楚是否有中国作者（包括在华外籍职员/学生）涉及事件。团队正在密切关注事态发展。
