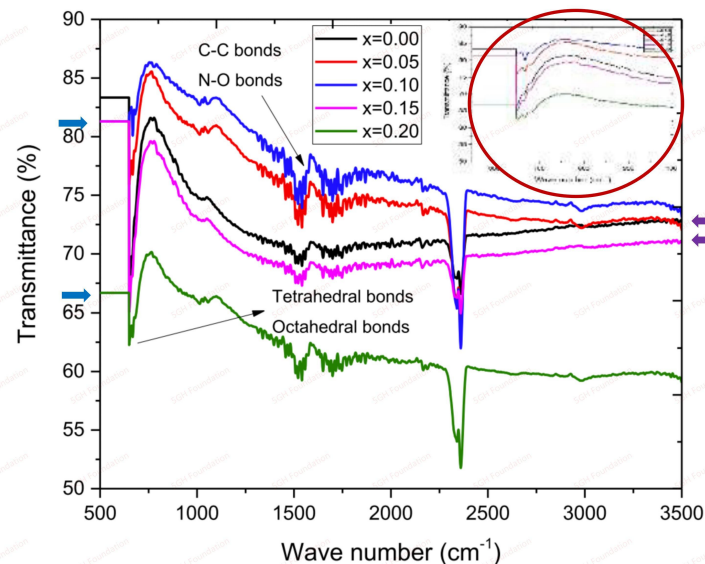

Fig. 2. FTIR spectra of $\text{Ni}_{0.7}\text{Zn}_{0.3}(\text{ZrIn})_x\text{Fe}_{2-2x}\text{O}_4$ with $x = 0.0, 0.05, 0.10, 0.15, 0.20$ ferrites.

Previously, a PubPeer post pointed that the crystallite size data on the Table 1 was incorrect.

Title: Design and tuneable magnetodielectric ferrite-based meta-absorbers for high-frequency microwave absorption applications
